

OCTOBER 2-4  
2015

WELCOME TO

# MEDHACKS

@JOHNS HOPKINS UNIVERSITY

#MEDHACKS

**Dear MedHacks 2015 Participant,**

Today is the day! We're so excited to host you for the weekend for the inaugural MedHacks medical and healthcare hackathon at the Johns Hopkins University, from October 2nd to October 4th 2015.

Enclosed in this packet, you will find everything you need to know to have a successful MedHacks weekend.

## WI-FI INSTRUCTIONS

### For JHU Students

Please connect to the “**hopkins**” network.

“This network is intended for use by Johns Hopkins faculty, staff, students, or anyone with a valid JHED ID. The *hopkins* wireless network is built with many security features, including WPA2-Enterprise, PEAP, and powerful 256 bit encryption. A high speed data link is provided to all the resources on the internal network.”<sup>1</sup>

To connect, please use your JHED ID and Password.

### For non-JHU students with .edu e-mail accounts

Please connect to the “**eduroam**” network.

“Eduroam (education roaming) allows users (researchers, teachers, students, staff) from participating institutions to securely access the Internet from any eduroam-enabled institution. The eduroam principle is based on the fact that the user's authentication is done by the user's home institution, whereas the authorisation decision allowing access to the network resources is done by the visited network.”<sup>2</sup>

To connect, please use your home institutions e-mail address and password (end in .edu).

If you have any issues, please “contact your administrator and ask for an account. You (or your network administrator) will have to configure your computer to enable eduroam access”.<sup>2</sup>

### For everyone else

Please connect to the “**JHGuestnet**” network.

“The “**JHGuestnet**” network is for casual use by guests and visitors at any Hopkins Campus. In addition, “JHGuestnet” can be used for devices that do not meet the requirements for the “hopkins” wireless network. We strongly recommend that all faculty, staff, students, or anyone with a valid JHED ID not use “JHGuestnet” service, but instead use the “hopkins” wireless network.”<sup>1</sup>

To connect, please provide a valid e-mail account.
